

# The Rainbow Bridge Has Arrived:

## A Permissionless Bridge to Last 100 Years

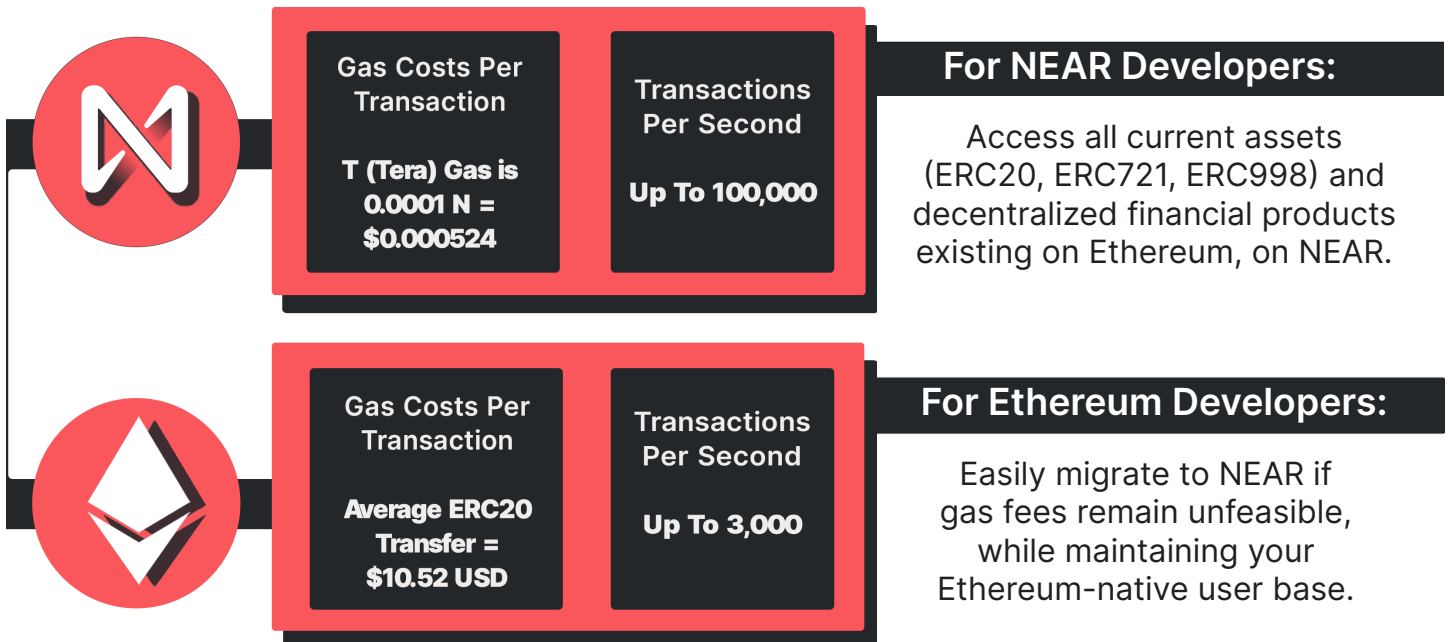

*"The Rainbow Bridge allows developers to utilize Ethereum assets and smart contracts on NEAR—a fast, scalable, and low-cost environment. The Bridge has the power to accelerate community development as it allows ETH users immediate access to apps built on NEAR."*

- Alex Skidanov, Co-Founder of NEAR Protocol

### Rainbow Bridge Specs and Features:

- Fully Decentralized and Permissionless: Anyone, Anytime, Any Asset.
- 1000 x Cheaper Gas Fees On NEAR Than Currently On Ethereum
- Maintain COMPLETE Custody of your assets as you move them between networks

### It's All on NEAR Protocol:
